a paper journey

Traveling Exhibition

SILK ROAD, A PAPER JOURNEY

An unexpected journey into the heart of the legendary Silk Road, birthed in the imagination of an internationally famous artist Isabelle de Borchgrave.

It is a multi-sensory experience conjuring up extraordinary atmospheres created by of 5 sumptuous paper decors depicting over 25 characters and dozens of objects fashioned out of paper and hand-painted.

A multi-sensory journey: 5 immersive audio atmospheres and 5 systems for olfactory diffusion, a workshop for exploring substances by touch. The hyperrealist decors: the artist's library, portal into the world of paper. A spectacular multimedia room with projection mapping, following the Silk Road today.

An entirely modular exhibition (with the possibility of adding further decors and adapting the collections according to the exhibition venue).
